

WG 4, Technical Implementation of Biometric Systems

- 1) Develop technical best practices, guidance, implementation requirements and biometric profiles that support the successful use and interoperability of biometric applications.
- 2) Serve as a source of expertise in the field of technical implementation of biometric systems to other WGs of SC 37.
- 3) Consider, during the development of these standards and technical reports, the interaction with other standards and technical reports under development in other SC 37 WGs and other internal and external liaison organizations, as appropriate.
- 4) Work in collaboration with other SC 37 WGs to address inter-related issues of specific projects under development in WG 4 or in another SC 37 WG that might extend across the Terms of Reference of the WGs.
- 5) Identify and enlist the support and participation of experts to promote and progress the objectives and activities of SC 37/WG 4.
- 6) Support SC 37's goals by responding in a timely fashion to requests pertaining to this area initiated by SC 37, its WGs or other organizations such as JTC 1 SCs, ISO TCs and other SC 37 Liaison organizations.
