

Moving forward...

- ▶ Over the past months and related to the planning of this workshop, a few of us want to have deeper discussions on these subjects, but it was not always clear where those discussions could take place
- ▶ So after some consideration, we decided a non-profit organization would be a suitable forum where we could move these discussions forward not only for the geospatial domain but also for other domains
- ▶ Enosema Foundation
 - ▶ Enosema is derived from Greek "henosema" which means "true sign" -- with the intention to cover the meaning of "insight (enorasi) into semantics (simasiologikos) ".
 - ▶ US-based 501(c)(3) non-profit organization
- ▶ The Enosema Foundation facilitates the mutual understanding of entities by providing insight and clarity to concepts. The Foundation achieves these goals through contributions to the domains of terminology, ontology and semantics.
